

At Publicis Sapient, Experience Technology teams are designing & implementing complex solutions leveraging the latest frameworks like React/Angular/Vue. The teams develop nimble and market-facing applications across web, mobile web and apps (using React Native / Ionic / Flutter and also native implementations). The XTians also strive to create more relevant and stronger experiences beyond the screens that help our clients quickly address the customer's wants and needs.

As a digital business transformation partner of choice, we've spent nearly three decades utilizing our ingenuity and the disruptive power of technology to help digitally enable the businesses of our clients in their pursuit of next.

We bring a startup mindset and agile methods to both established companies and the public sector to unlock value in ways that delight their customers and improve their operational effectiveness. Our approach to transformation is simultaneously grounded in a view of both the company and the customers, and a unique fusion of strategy and consulting, experience and engineering, along with an enduring culture of problem-solving creativity.

In the space between Next and Now is How. And we believe that How you seize that space is everything. Learn more: <https://www.publicissapient.com>

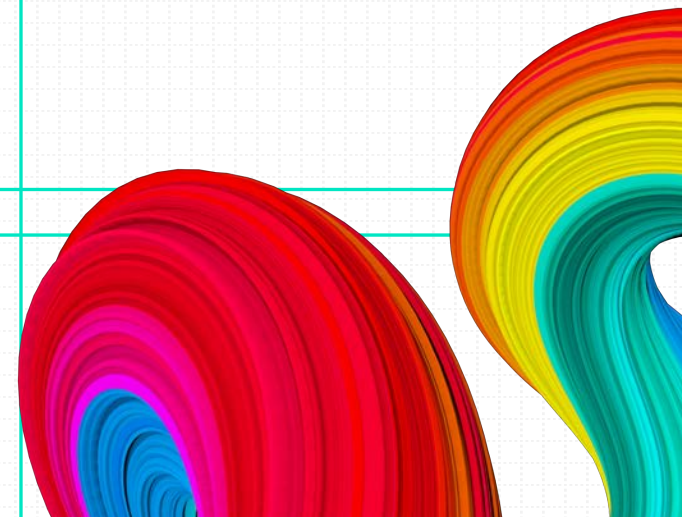

We Want To Hire *You!*

And to help you clear our interview process, we have curated some the best resources available across the web.

THE PROCESS

Here are the major areas in which we probe:

- Core XT Round
 - Framework Round
 - React/Angular
 - Node, Dev Ops & Cloud Basics (nice to have)
 - Attribute Round
- 

Core XT Round

WHY

Having a strong foundation leads to a long sustainable career. Frameworks come and go – what enables nimbleness in switching between these FW's are strong fundamental basics. Hence – the focus on OOJS, HTML, CSS & other core topics. Remember: No matter what FW you use – browser end of the day renders HTML.

WHAT

- Programming Paradigms (OOJS, FP)
- Design Patterns & SOLID Principles
- ES6, TS (optional)
- Responsive Web Design & Development
- DOM & Browser APIs
- NFR
 - Accessibility, Security, Performance, SEO
- Tooling: Module bundlers, linters, etc.

Framework Round – React / Angular

WHY

This needless to say – is the need of the hour. We have a lot of projects which are running on the React or Angular primarily. We also have projects running on React Native, Flutter and Vue. Even if your exposure is limited but you know the WHY of things – we will train you to get better at the HOW.

WHAT

- Core Principles
- State Management
- Managing Styles & Theme
- Code Organization
- Routing
- CSR/SSR/SSG
- Code Splitting & Performance
- Error Handling
- Unit Testing
- Deployment Practices

Framework Round (Coutd) – Node, Dev Ops & Cloud Basics (nice to have)

WHY

Full cycle is the way for us too. Know the complete end to end development life cycle – is what we would want all our engineers to be. This is a nice to have for us to start with. We will train you – to be good at it eventually ☺

WHAT

- | | |
|--|--|
| ○ NodeJS Fundamentals | Monitoring Practices |
| ○ Microservices With Framework of Choice e.g. Fastify, Express | ○ Performance Tuning & Debugging |
| ○ Security Best Practices | ○ Caching |
| ○ Event & Message Queues | ○ Containerization (Docker) |
| ○ Database Fundamentals | ○ Cloud Fundamentals With Vendor of Choice |
| ○ Deployment, Logging & | (AWS/Azure/GCP) |

Learn More About Our eXperience Technology Domain

What is eXperience Technology?

Front End, Web, Interactive, Site Developers?

We are a community of 1200+ experience technologists, specializing in experience creation across 8 industry verticals at Publicis Sapient. In India, we are close to 960+ XTians with primary skills split across React, Angular, React Native, Flutter, Core XT, and Full Cycle

What makes us Awesome & Unique?

PEOPLE

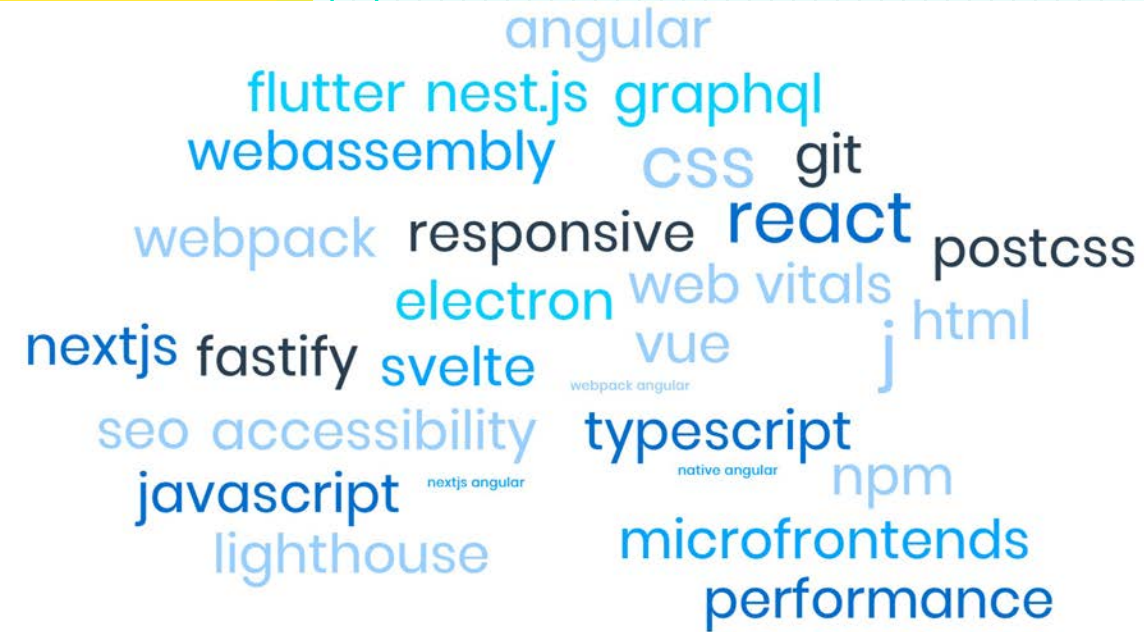

Our people are our ambassadors and all of our community initiatives are for them and by them.

CRAFT

We have specialists in all our major needed skills who believe in sharing and giving it back to the community.

Learning & Talent Development

With diverse domains and projects - we work on the latest and greatest of tech stacks - to create the maximum impact for our clients by providing them the best possible solutions.

To ensure our people are always ahead of the curve - we run tech-trainings throughout the year. The learning never stops.

Giving it back to the community...

Our Own Global Conference (XTSUMMIT.com)

Engineering Experiences, the theme that defined the summit in 2020, revolved around five key technological elements that are instrumental to design thinking, experience creation and business transformation.

At the XT eSummit 2020 we brought to the fore what lies ahead in the future of eXperience Technology.

ARCHITECTURE EXCELLENCE

In the past year, our team has worked on developing adoption-ready reference architectures, some of which have already been adopted in several projects.

Adoption-Ready:

Atomic React Pattern Library

Universal React

React Lite

Web Components Lib

In Progress:

React Widgets

Micro Frontend

Universal Vue

JADE (accelerator)

Accelerators & Solutions

Web Application Modernization

Web Application Modernization is a solution that prepares businesses for rapid innovation at scale through strategic code refactoring.

Engineering Transformation

Engineering Transformation is a holistic program that modernizes Information Technology (IT) to prepare companies for comprehensive Digital Business Transformation (DBT).

Digital Marketing Assessment for Automotive

The digital marketing operating system assessment measures the digital maturity of an automaker and develops a prioritized roadmap to transform customer engagement.

Rapid Commerce

Rapid Commerce is a cloud-native solution based on microservices that gives companies an agile way to implement commerce in their environments. The adaptive architecture empowers retailers to continually modify the customer experience, quickly & easily.

Point-of-Sale (POS) Modernization

Our unique Point-of-Sale (POS) modernization approach combined with our Rapid Commerce accelerator can help retailers leapfrog in their pursuit of a modernized, cloud-native POS system.

Pharma Growth Accelerator

The Pharma Growth Accelerator uses a wide range of digital tools and data to help pharmaceutical companies in sales and marketing.

Our Services

[Strategy & Consulting](#) | [Customer Experience & Design](#) | [Technology & Engineering](#)
[Enterprise Platforms](#) | [Data & Artificial Intelligence](#) | [Innovation & Digital Product Management](#)

In the Technology & Engineering Space

Engineering Transformation:

We analyze the value streams within an IT organization to align the enterprise technology strategy with the needs of businesses and customers. We introduce new methods, processes, platforms and tools within IT to unlock innovation, speed and quality. We help our clients shift not only the technology but also the ways of working to achieve continuous improvement and value creation.

Experience Technologies:

We develop nimble, market-facing applications across web, mobile and voice that help our clients quickly address customer wants and needs while forging more relevant and stronger experiences along the customer journey.

Microservices & APIs:

We engineer and operate microservices and API platforms that enable stronger collaboration and agility within teams to accelerate digital innovation.

Site Reliability Engineering:

We improve connectivity across engineering, operations and governance teams and apply automation and machine learning to ensure systems are reliable, efficient and cost-effective.

Cloud Engineering:

We help organizations bring applications to market faster through the cloud and reduce risk with consistent, secure and reliable deployments through automation and self-service.

Software Implementation:

We help our clients select and implement the right software and use our proven, agile approach to accelerate marketing, commerce and business operations.

THANK YOU !!!
